

The Description of HM6-D Concrete Truck Mixer:

1. HAOMEI serial Concrete Truck Mixer is strong well designed equipment meant for transporting concrete / mortar from concrete batching plant directly to the place where it is to be poured
2. Effectively delay concrete coagulations, avoid concrete stratification and eduction, and ensures construction quality and speed.
3. Wide range of application especially for mass concreting works like Construction of Canals, Bridges, Highways, Dams, Multistoried & Industrial Buildings, Factories, and Airports for ready mixed concrete works.
4. Including many models such as 8m³, 9m³, 10m³, 12m³, 14m³, 16m³, and any tailor-made-for-mixer-truck special chassis both at home and abroad.

The Features of HM6-D Concrete Truck Mixer:

1. High-intensity drum material
2. Optimized mixing blades, low material residue
3. High-quality parts, reliable running
4. Excellent performance and convenient operation
5. Imported original hydraulic system

The Technical Parameters of HM6-D Concrete Truck Mixer:

Specification	Unit	Value
Mixing Capacity	m ³	6
Tank Volume	m ³	9.96
Feeding Speed	m ³ /min	≥3
Discharging Speed	m ³ /min	≥1.5
Residual Ratio of Discharging	%	≤0.5%
Water Supply System		Air pressure
Water Tank Volume	L	260
Overall Dimension	mm	8450*2496*3835
Chassis Model		Steyr
Clutch	φ	φ430 Monolithic dry type
Min Ground Clearance	mm	297
Max Speed	km/h	75
Engine Max Output Power	kw	247
Emission Standard		Euro III
Rated Load	kgs	12600
Overall Weight	kgs	25000
Wheelbase	mm	3225+1350
